# **WEATHER OF CONCERN**

## **NORTHERN CALIFORNIA**

- Over the weekend and early next week, the combination of monsoonal moisture and instability will likely lead to isolated thunderstorms in the mountains and upper foothills.
  - Minimal rainfall can be expected with these thunderstorms across very dry fuels, will yield a threat for fire.
  - A Fire Weather Watch can be expected Monday morning through the evening hours.

## **SOUTHERN CALIFORNIA**

- No significant weather to report

# **WEATHER KEY POINTS**

**07/24/21 - 07/30/21**

## **Saturday-Friday**

- Fire weather conditions remain elevated through the upcoming week, especially across the foothills and mountains where locally gusty winds are likely each afternoon and evening
- Isolated showers and thunderstorms remain possible each day across southeast California, spreading back over the Sierra and into the Central Valley this weekend into early next week.
  - Some storms Saturday through Monday could produce locally heavy rainfall, leading to a slight chance for flash flooding.
  - Some thunderstorms, especially in the Sierra, could be relatively dry and lead to new fire starts
- Low to moderate heat risk impacts persist across the Central Valley and into interior southern and northern California locations into the weekend
